(If not otherwise stated, limits apply to entire frequency range: ca. 600 to 3000 MHz.)

	These guidelines are based on biological effects of short-term, high-level exposures only, also referred to as thermal effects. Germany (1996), USA (1997), Japan (1997), Switzerland (2000), Australia (2002), Finland (2002), Sweden (2002), UK (2004), Austria (2006), etc.
