Electromagnetic Radiation - Concerns and Informed Choices

[View Latest Newsletter](#)

[Our Newsletters](#) | [Scientific Evidence](#) | [Reducing EMR](#) |
[Measuring EMR](#) | [Networking and Support](#)

Newsletter July 2015

In our June issue, it was announced this publication would change from monthly to quarterly. However, some readers expressed a desire to remain current with emerging events and trends. Consequently, we have decided to adopt a periodic approach and send out a newsletter whenever sufficient content has been compiled. As always, the purpose is to help promote in the public interest a fair and balanced discussion of the topics at hand.

Everyone is invited to send by email new material for inclusion in the next edition.

Readers may be interested to know that our mailing list includes nearly 100 researchers and organisations that might be considered "unsympathetic" to certain EMR concerns. So far, only one has unsubscribed. Maybe a few of them are reading this page with you right now.

Local News - Northern NSW, SE QLD

Students of Holy Spirit School in New Farm QLD opposing nearby phone tower.

In an interesting development, Optus and Vodafone appear to have invoked their right to compulsory access under the Federal Telecommunications Act 1997. This was done after a reported breakdown in negotiations with the owner of a building they are seeking to fit

with a tower. He is presently considering his legal options. There is also significant community objection to this site, which is within 200 metres of the Holy Spirit School. This seems to be against the Department of Education's own guideline for a 500m minimum. The telco's self-assessment that this is a "low-impact facility" does not appear to meet the necessary criteria that it be no higher than 5 metres on a building. You can sign their petition here. [https://www.change.org/p/vodafone-and-optus-stop-the-proposed-vodafone-and-optus-mobile-phone-tower-at-92-96-merthyr-road-new-farm-less-than-170m-from-holy-spirit-school?](https://www.change.org/p/vodafone-and-optus-stop-the-proposed-vodafone-and-optus-mobile-phone-tower-at-92-96-merthyr-road-new-farm-less-than-170m-from-holy-spirit-school?recruiter=297893397&utm_source=share_petition&utm_medium=facebook&utm_campaign=share_facebook_responsive&utm_term=des-lg-no_src-custom_msg)

Update From the Maleny QLD Area

Faced with rejection by local property owners, NBN has taken to "road closure" as a new approach to acquire land for towers. They declare a small portion within a large road reserve to be no longer a road, and then lease it for 20 years. This method is being proposed for sites in Hunchy and Peachester. The Hunchy site (224 sq m) was advertised for road closure in April 2013, surveyed in January 2014, and the Development Application lodged on 5 June

2015. A community information session was not held until 17 June 2015. It is about 1.6 Km from the Montville tower and about 2.2 Km from the other Hunchy tower. One resident will be able to see all three.

The Peachester site (80 sq m) was advertised for road closure in May but put on hold until the 14 May information session in Maleny. It was reactivated on 5 June and is open for public objections until 16 July. There was a community information session held at Peachester on 16 June by NBN, attended by about 150 people. They demanded and got a Q&A period. The determined and very relevant questioning put NBN on the back foot. The Maleny group, who sent us the foregoing information, provided assistance to this gathering through their display material and presence.

The Q&A session at Peachester QLD.

Mobile Blackspot Program = More Towers

Eight new mobile phone sites will be built in Richmond NSW as part of the Government's \$100 million "Mobile Phone Blackspot" program. The sites, supposedly based upon customer requests, will be at Possum Creek, Coffee Camp, Clunes, The Channon, Koonorigun, Burringbar and Farrant Hills. All will be developed by Telstra. Under the arrangement Telstra must give other mobile network operators the opportunity to co-locate on the base stations. The first will be rolled out towards the end of this year, and it was announced a further \$60 million will be allocated for Round 2. Mullumbimby Steiner School Opts Out of Wi-Fi

The following notice appeared in the current newsletter of the Shearwater Steiner School in Mullumbimby NSW. "Wireless access points will be removed and replaced with Cat5e cable. This policy decision has been made based on an in-depth review of relevant research on the

potential effects on physical health, as well as pedagogical concerns about the negative social and emotional impacts on students of frequent laptop, mobile phone and internet use. We are proud to be the "point of difference"™ in this respect. Providing your children with an optimal learning environment will always be our priority." <http://us1.campaign-archive2.com/?u=a1e1ac81d0185ad2011a5901c&id=3b4327c3f2>. Readers who prefer a microwave-free learning environment, or wish to inquire about the methods the school has used, can contact them via their webpage. <http://www.shearwater.nsw.edu.au/>

Wi-Fi

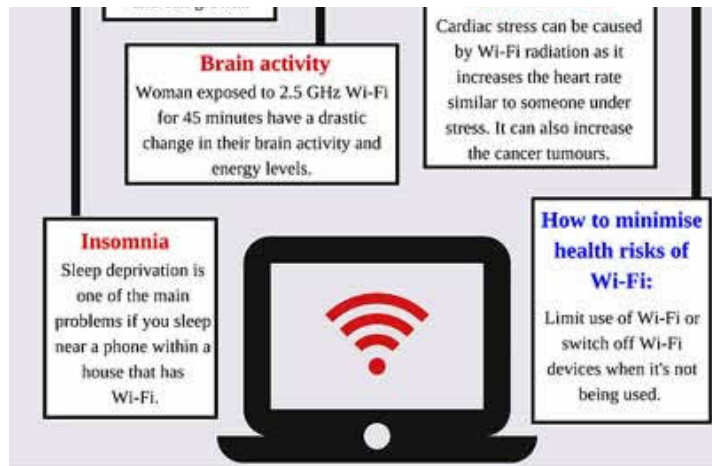

Home, Business, Hotspots, Transport

After teasing the public with a short period of free internet access, "Telstra Air" Wi-Fi Network Goes Private. <http://www.itnews.com.au/News/405768,telstras-air-wi-fi-network-goes-private.aspx>

Telstra is proceeding to fully activate its Wi-Fi network in 250 towns and cities. So far, the 4000 hotspots will be comprised mostly of converted payphone booths, denoted by a pink top. Existing Telstra subscribers can access these to draw on their home broadband allowance when out and about. But the company plans to spread the network much more widely by utilizing privately owned home and business modems. Telstra has about 2.6 million internet customers, more than one million of whom currently have modems capable of becoming hotspots.

As the distinction between consumer products and their service infrastructure blurs, the next trend may be to piggyback hotspots onto the mobile phone network to boost coverage. Smart Meter Removal Costs Man \$11,500. <http://www.theage.com.au/victoria/smart-meter-removal-costs-man-11500-20150616-ghp6tu.html>

*Damage in Bensalem PA which the Fire Chief
blamed on a smart meter.*

Due to recurring instances of fires associated with smart meters, the National Electrical Manufacturers Association (NEMA) "strongly recommends that all existing meter sockets be thoroughly inspected when electrical meters are installed. They are also concerned that, "The interval between site visits by utility personnel could be as much as 100 times longer than the monthly opportunity for inspection (of analogue meters)." Smart Meter "Malfunction" Causes Pennsylvania Apartment Building Fire.

Crisis Averted as Ontario Smart Meter Explodes Next to Gas Line. <http://www.torontosun.com/2015/06/03/crisis-averted-as-ont-smart-meter-explodes-next-to-gas-line>

"(A) fundamental difference between the two meter approaches (smart vs. analogue) is that the smart meter relies upon RF radiation to communicate information to other smart meters, the utility and eventually to the ratepayer's appliances. It now appears that the RF radiation degrades the contacts, causing corrosion resulting in resistance, overheating and ultimately a fire." Public Comments before the Maryland Public Service Commission,
